

*This reference point is the **“Safety Stop Position”** which allows a deep 90° search to the Target Area for approaching vehicles.*

Practice Viewing in a Parking Lot

Deliberate Practice

AWARE

Consciously viewing this reference point will provide you will accurate judgement of where the car is located in relation to the curblane.

ACTION

Have the car positioned with the front bumper even with a line. Then, as a driver and as the co-driver, see where the line appears on the car. The position of the line to the car may vary slightly from what is illustrated based on your eye dominance, seating height, and vehicle type.

REWARD

You can use this same process to learn how to accurately position any vehicle. You will not be fooled into making wrong decisions.

Fold and use glove box as a holder. **Warning:** Read cue before moving the vehicle.
