

Mind Cue

Evaluate how your driver stops to the rear of the vehicle ahead. You can evaluate whether the driver made the stop with the tires visible. If so, **make the driver feel good** by stating, "I noticed you stopped to see the tires, which gives you all these rewards." Then read the list of rewards.

Fold on lines. Use glove box as a holder.

Warning: Read cue before moving the vehicle.

Find Stopped Vehicles!

AWARE

1. Aware of stopped traffic
2. Adjust Speed for Slow Closure
3. Check Rear Zone Condition
4. Stop to See Tires

As the co-driver, search the A zone for stopped traffic. When you find stopped vehicles (a Closed Front Zone) consider it a "Slow" condition. Check your "Co-Driver Rear View Mirror" or, the outside mirror for cars approaching from the rear. Decide if you were the driver what actions would you take with the pedals. Be aware of how the driver's approach speed is performed. Can it be more gradual?

Place the Mind Cue, shown below, in the car held by the glove box as a reminder of what to evaluate.

REWARD

Reward for having space:

- Gives you independence from others' actions.
- Gives you an escape path.
- Prevents being boxed in.
- Prevents stress.
- Puts you in control.
- Helps prevent robbery, carjacking, kidnapping.
- Eliminate or reduce rear-end crashes.
- Reduce severity of whiplash injury.
- In bumper-to-bumper traffic reduce distraction error.
- Reduce intake of exhaust fumes.
- During slippery conditions, slide into empty space.

ACTION

Stop to See Tires
